

CETP Module 4.2: Vapor Distribution. What to expect: Students will take a number of quizzes and tests in order to assess their pace of learning. A multiple choice test will be administered at the end of the class.

This course addresses the different system tests & checks required when installing new piping, regulators and appliances or restoring service to an existing vapor distribution; validating the container, piping, and regulator; how and when to make the final connections; how to purge the system of air, appliance controls and safety devices, and how to adjust the burner.

MO-PERC (Missouri Propane Education & Research Council) funding underwrites the cost of student and test materials as well as a copy of 2015 NFPA 54, pencils, markers and other materials. Lunch and break refreshments are also provided. Other meals, lodging and travel are not included in the class fee.

2019 Summer Schedule

The topics covered are:

- Vapor distribution system tests
- Validating vapor distribution systems
- Identifying venting requirements and characteristics
- Validating combustion air
- Leak Check procedures
- Purging air from a piping system
- Placing appliances into operation
- Appliance controls and safety devices
- Spillage test
- Identifying burning characteristics of propane

Vapor Distribution CETP Module 4.2

Offered by the Missouri Propane Gas Association

Supported by the Missouri Propane Education and Research Council

Who should attend: Propane industry personnel who have previously completed CETP Module 1: Basic Principles and Practices and would like to expand their training to include vapor distribution.

CETP Module 4.2 Vapor Distribution is a two-day continuing education seminar geared toward the service technician or personnel involved in vapor distribution.

Propane Certification Training
